CAREpoint v2.0

the best just got better

Responding to your changing needs:

The next generation of CAREpoint Workstation

Ready for the new paradigm of prehospital care?

CAREpoint v2.0 is the smart platform for merging EMS communications, mobile telemedicine, secure messaging and documentation.

WHY CAREpoint?

Today's healthcare demands you do more with less. CAREpoint manages all your needs to help you improve care, while saving space, time and money.

Already a CAREpoint user?

Now is the perfect time to upgrade. Contact us to take advantage of limited-time trade-in incentives!

New Feature	Benefit
• 4th Generation PC Module	Windows 7 operating system, faster performance, enhanced robustness, security & hardware support to satisfy the needs of users and IT departments alike.
• Updated User Interface	A more contemporary look & feel with new graphics, 19" touch-monitor and handset.
• Instant Recall	No more "please repeat your message" with this option. You can even export call audio. Save time & simplify communications.
• Remote Control	Away from the CAREpoint? No problem. Increase productivity by handling calls from a connected iPad tablet as your virtual CAREpoint on the go.
• e-Bridge and e-Net Messenger Integration	The ability to exchange HIPAA secure, 12-leads, pictures, video & messages with EMS & medical teams. Telemedicine for improved decision support with day-day STEMI, stroke, trauma, burn, refusals, disaster coordination, community paramedicine & more...
• D-Scribe Log Recorder enhancements	QA/QI Report generating tools, DVD & network archive of voice, 12-leads, email, fax, telemedicine
